### Description

Italian Mid-Century Sculptural-Figurative  
Sandstone Wall Pannel / Picutre signed 1950s

The mural shows a relaxed, classical-looking scene of male and female figures that has been translated

into the light-footed fifties.

The object consists of 3 sandstone blocks which have been divided according to the outer edges of the figures.

The scenery is flowing and radiates a casual get-together.

The figures emerge vividly from the 4.2 cm depth of the frame and therefore appear very lively.

The open-pored surface is rough, smoothed and carved natural stone with a wonderful patina.

The object is simply framed in a wooden frame
