Description

Especially table in silvered bronze. Work from the first half of the 19th century. Very elegant, especially tabletop, taking up the antique architecture of the gardens with this gallery with balusters reminiscent of terraces and balconies, the oval shape is punctuated by molded projections, It is a work of high quality and very old neoclassical style dating from the first of the 19th century, probably the Restoration period. Complete with its oak parquet floor and its original removable mirror, this above or centerpiece is in silvered bronze, with its silvering also original, we observe a beautiful finish and a generously worked material in particular the baluster in the round, clearly shows us a quality piece. Slight wear to the silvering, the mirror shows wear which is completely normal.
