Description

Beautiful ceremonial office table, Val de Loire from the 17th century, in walnut wood, twisted base, which totally reflects the spirit of the Louis XIII period. The non-molded top is held by side sockets. The belt is uncovered with a large drawer on the front. The base has a vigorous torso with a rib highlighted in black, creating a double torso. On the central spacer, 2 twisted legs alternate with 3 tops in a downward spindle. Beautiful Loire Valley table with powerful decoration, the most representative model of its 17th century period. Very good state of conservation and beautiful patina.
