Height : 5 cm

### Description

Humans, although they belong to the terrestrial fauna, submit to their laws the other orders of nature, rarely stopping over their crimes; Sometimes they seem surprised but too few remain in awe of a shell, a starry sky, or a bird; I submit here for your admiration a vegetable whim to which it is easy for us to give meaning, as long as you are sentimental....(on earth, there are sentimental people and then...the others.) Cut of oak with thwarted vegetation leading to a surprise effect collected a few decades ago by a ...sentimental. Small visible break without harm to the conservation of the piece.
