

"stars Of Saint Vincent" Brooch, 750 Thousandths Gold Setting. Early 20th Century.

450 EUR

Period : 20th century

Condition : Très bon état

Material : Gold

Length : 5,4

Description

Regional work for this 750/1000 gold jewel. On a branch-shaped stem, three stars of Saint Vincent are placed (one large and two smaller). On the back we find a clasp pin. These stars are the fossil stems of a marine organism: the crinoid. They are called "pentacrines". The black of the fossils is very highlighted on the gold frame: mark of a hallmark. Weight 3.30g (tolerance) Beautiful work from the Digne les Bains region (04)
