Description

One of a kind ! We recently found this particularly large cloister table/dining table in Ghent, Belgium. Made from solid oak. The table dates from around 1910/1920. For the past 35 years, it has sat unused in the attic above a restaurant, under a thick layer of dust. We have never found an authentic antique table this large. We can deliver the table throughout Europe. She weighs around 600 kg. The board can be divided into 4 beams. Dimensions: 603L x 120B x 77H
