### Description

- Stone fountain of neoclassical inspiration, 20th century work.

Fountain whose molded decoration takes up the ornamental vocabulary of ancient architecture; perfect symmetry, flat relief, molding punctuated by vertical decoration. Like a base or plinth, the ornamentation of this fountain is composed at the top and bottom of moldings set at right angles, alternately flat, curved, convex or concave (reversed cave, heel, bevel, corbin beak, etc.).

These frame a central space decorated in its center with a flattened relief table motif, the pipe is positioned just above it. - With a simple and elegant design, this fountain will fit easily into an interior or exterior decor.
