### Description

Enthroned on wooden trestles, these large oak display cases displayed an incredible diversity of bird eggs, protected by the large window. The pre-convention collection includes a wide diversity of birds, impossible to list in the context of this announcement. The small data sheets for each species are present. These lockers, the size of a coffee table, are very resistant, they are filled with peat which provides a beautiful padded case for the hundred or so eggs they contain. For handling if hand delivery will be preferred and in this case, the collection will remain as in the photos but if transport must be considered, the two crates will have to be restocked, the eggs will travel in separate boxes. Handling price to be agreed.
