Description

Wooden relief sculpture, carved panel "Holy Family" - 19th century

Splendid walnut panel carved in high relief with the representation of the Holy Family, the Madonna holds the Baby Jesus on her lap, behind them is St. Joseph who, in his right hand, holds his carpenter's tools, at the Virgin's feet is sculpted the Lamb; in the background there are houses and plant ornaments.

The state of conservation is good, there are no deficiencies.

The panel on the back has "tunnels" due to the passage of woodworms, in my opinion the board used was planed before being sculpted.
