

Do You Know How To Plant Cabbages, In Fashion...from Us

220 EUR

Period : 19th century

Condition : Très bon état

Material : Solid wood

Height : 130

Description

Damn, it's not going to be an easy task to send it by post, already unpackaged it measures 130 cm... This "rural" object is called a surveyor's compass... it comes from Burgundy so we can assume that it was used for something other than planting cabbages... would you think of the vineyard??? I even hear the sound of the forge when the local farrier shaped the irons...
