

## Iron épiscopal Ring

5 000 EUR

Period : 18th century

Condition : Très bon état

Material : Wrought iron

Length : 3.2 cm.

Height : 5 cm.

### Description

In steel with a seal engraved with a flame and two hammers. Opening onto a reserve, with a rich decoration of silver appliques, set with a coral cameo and the bishop's coat of arms: "Azure with an eagle in flight lowered in silver, crowned with the same" this ring was worn on a glove, just like the pontifical rings which were worn by the papal legates. Italy, 18th century
