Height : 46 cm

Depth : robinet inclus 30 cm

### Description

Beautiful and large Empire hot water fountain in the style of Antique in patinated bronze and silver-plated metal. High quality model in the shape of a large "Medici" vase on a square section base with side grips with scrolls and shoulders decorated with "men's heads" in the Antique style. The grips are made of turned ebony and the body is decorated with an Antique frieze decorated with plants and lyres. This fountain is complete with all its original elements: its ember tank, its lid with its removable valve; below the base, a flap opens to eliminate the remains of embers. The silver-plated metal faucet is also original as are the 4 small ball feet and the lid socket. A superb and large, very elegant neoclassical model dating from the very beginning of the 19th century. NB / Shipping
