Description

Very important and exceptional carved walnut panel from the Louis XIV period, representing the annunciation, in a heavily molded frame decorated with foliage at the corners. The powerful scene, depicting the moment when the angel Gabriel appears to Mary on a cloud, is sculpted in strong relief. Rare piece due to its quality of execution and its impressive dimensions. Very good state of conservation, completely in its original state (just tiny losses to report on the fingers of the two main characters). Dimensions: 136 X 111.5 cm Contact us for shipping.
