

Convexe Mirror On Stand

1 200 EUR

Period : 19th century

Condition : Très bon état

Material : Mahogany

Width : 29

Diameter : miroir : 16,5 | socle : 21 cm

Height : 53

Description

[France], 19th century, Turned mahogany wood, brass. Convex spherical mirror, articulated and mounted on a stand, completely removable.

This type of mirror was used during the 19th century in physics offices to study the laws of light reflection. The height is adjusted by a wooden screw on the foot, the inclination of the mirror by two brass screws.

Beautiful model in good condition, bears inscriptions on its base including a crossed out inscription: the initials LA and the n° 185 and the n° 221532, traces of old labels on the base and the foot.
