Period : 20th century

Condition : Très bon état

Material : Glass

Height : 30,5 cm

Description

Pretty pair of iridescent glass vases by Kralik glassworks. Long-neck bulb vases with iridescence on a green background and hot-applied filaments, in the purest art-nouveau spirit. Shape of the bulb dented to break any geometric markers, characteristic of this period. The whole is enhanced by a small frame with a metal collar, decorated with water lilies. Very good condition of the glassware, oxidation of the frame (to be revived with a brush). 12 inches tall. Beautiful pair of 1900 vases, beautiful and rich glassmaking techniques on these old pieces.
