Description

This beautiful "Stativ IIb" model has two objectives, its condenser is adjustable in height and underneath, here is a double-sided mirror, flat and concave. It also features a lens by K Kovitska Milano. The Leitz company, which later became Leica, began its activity in the second half of the 19th century and continued to innovate in the field of optics by expanding its offering from binoculars to projectors including microphotography. and of course, the microscope like this early 20th century model presented here.
