

Ancestor Of Our Credit Cards.....and It's Papou

140 EUR

Period : Before 16th century

Condition : Parfait état

Material : Solid wood

Diameter : 0.6 cm

Height : 25 cm

Description

In the paradise islands, we invented the equivalence of our credit cards, several centuries ago... If an essential purchase could not be paid for or honored with a job, in Oceania, we left the seller his hairpin as a pledge... With the image of a protective ancestor, it is obvious, so as not to offend him, that we were busy recovering his object as quickly as possible by closing his credit... The totem stood watch over the grain with its height of 25 cm.
