

## Bronze Candlesticks Late 16th-early 17th Century (pair Of)

780 EUR

Period : 17th century

Condition : Bon état

Material : Bronze

Diameter : 14.5 cm environ

Height : 18 cm

### Description

Interesting pair of bronze candlesticks from the late 16th - early 17th century, Northern Europe region. Strong circular base with two threads. Winded barrel with a large knot at the top in the shape of a top. Originally pierced binets. Small defects due to time, some oxidation spots, tiny deformation at the base and micro-crack at the bottom of a barrel, tin solder under a base. (see detailed photos). I list all these details for the sake of accuracy, despite this, I consider these candlesticks to be in good condition given their age and use. Very good stability Note: uncommon model. Delivery: EUR15 for mainland France.
