Description

Original piece from the 60s, made in Denmark in laminated teak wood. This six-drawer chest of drawers that they contemplate shows us a simple design, devoid of superfluous elements, where all the importance goes to the organic shapes that natural wood gives us. It has a rectangular frame, arranged horizontally, with a front organized by six drawers. Finally, the body is raised by means of four stylized feet, typical of the time, of a conical shape that tapers towards the base. Very good condition, see photos. Height: 117cm Length: 87cm Depth: 45cm
