

Parisian Regency Chest Of Drawers

1 400 EUR

Period : 18th century

Condition : Restauré par notre atelier

Material : Walnut

Length : 127

Height : 86

Depth : 61

Description

I offer you this pretty chest of drawers called Parisian with a "heart" thanks to its pattern in the center of the drawers. Due to its classic design, for this period, this chest of drawers, mainly in Walnut, has some beech crosspieces, especially at the back... This piece of furniture opens with five drawers on three rows. The top row hides the classic central secret drawer. It has four original locks, the one on the bottom drawer is missing. The high crosspiece on the sides and scalloped, announcing the Louis XV period with great strides, its small "doe" feet also announce it. This piece of furniture has been completely revised by our Workshop and has undergone a restoration of use, cleaning, finishing, insecticide treatment.
