

## Small Roman Romano British Bronze Lead Steelyard Weight Metal Detecting Detector

3 270 EUR

Period : Before 16th century

Condition : Bon état

Material : Bronze

Width : 6.35

Height : 8.39

Depth : 6.35

### Description

Rome, Imperial Period, ca. 1st century CE. An elegant bronze and lead steelyard weight depicting a Cherub with wings, shown wearing a chain around his neck and with white eyes. with his wavy hair fantastically styled into twists that wraps around the entirety of his head. The bronze here is cast around a lead center, giving the piece a surprising weight; a perforation through the top of the head allowed it to be looped through a chain and hung from a balance. Size: 2.55" W x 3.3" H (6.5 cm x 8.3 cm) Steelyard balances were used to weight loads by moving a counterweight along the beam until it balanced and then reading the incised numeral. Vitruvius describes them and their function in his *De Architectura*, Book.

Dimensions: Height: 3.3 in (8.39 cm)Width: 2.5
