Description

17 kg - carved palm wood - cracks - shocks from use - In 2014, the exhibition at the Musée du Quai Branly "TIKI POP" explores the rise of the Tiki style, a unique and emblematic cultural phenomenon of American popular culture in the 50s and 60s. This style is characterized by a fantasized imagery of the South Seas, stemming from the exotic representations conveyed from the 18th century by explorers' stories, adventure novels, and later, Hollywood films.
