Teak Boat Steering Wheel - Late 19th Century

1 300 EUR

Period : 19th century

Condition : Parfait état

Material : Teak

Diameter : 125

Description

Rudder bar whose wheel has a brass hoop. This ship's wheel is made up of 8 turned wooden spokes and the same number of sleeves, used for maneuvering. In the center the hub is solid and has the hole used to insert the axle called "drive square", which is used to make the connection between the bar and the rudder. Used on a large boat or an old rigging, it is an exceptional decorative object for a marine atmosphere that will delight lovers and enthusiasts of the sea and navigation. ******** Period: Late 19th century Excellent condition after restoration in our workshop.
