

Pair Of Hard Stone Gate Pillars

8 800 EUR

Period : 20th century

Condition : Parfait état

Material : Stone

Width : 50 cm

Height : 350 cm

Depth : 50 cm

Description

Pair of portal pillars in hard stone from Hauteville (Ain) cut on its four sides in the last century and never installed, therefore in an irreproachable state. The shafts with a section of 50 cm square are cut with false joints and the capitals with a section of 74 cm square are topped with a diamond point. Their height under the capital is 320 cm which can be reduced by almost 30 cm, by burying their base with a height of 110 cm. You can visit our site: www.claudeaugustin.com
