Description

Very beautiful gouache from the 19th century, an anonymous French School in high quality oval format. Bright, it represents a landscape with fishermen in the foreground and a fortified castle in the background. Sailboats and boats animate the body of water, which is probably a mountain lake. The view is certainly imaginary and romantically inspired. The treatment of perspective and vegetation is particularly successful. Very beautiful more recent oval frame in a gilded frame of format: 38 x 47 cm. The whole is very decorative!!
