Description

Cabinet Louis Philippe in solid walnut, late 19th centuryThis very elegant French cabinet opens to two doors. It reveals three fixed shelves. Their surface is smooth. It is possible to store dishes or clothes since these same shelves have been cleaned thanks to a preventive biological treatment avoiding any smell therefore entirely natural.It can be transformed into a hanging clothes. The depth of the furniture lends itself to it. The door has a lock with its own key. The key is posterior to the cabinet. The entrance is wooden. The key is in working condition.The trunk of the tree was used to make the doors. Thus, the knots are visible from outside as well as from inside.This furniture is made from quality materials and built using ancient techniques: tenons and mortises weld the pieces of wood

together and strengthen the strength.The base of the cabinet rests on four very stable feet. The two back feet are straight, the two front feet are so-called « patin ».The cabinet is topped with a cornice made of mouldings overhanging each other forming a decorative crown.This type of furniture became fashionable in the nineteenth because of its sobriety but also due to the development of bastides.This piece of furniture was very often the result of a particular order.It is a piece of furniture of character. It is useful in a bedroom, living room. Functional, with the right proportions, the cabinet will naturally find its place in our modern homes. Its timeless aspect makes you want to keep the best of the past and enrich its history by settling into your home. In turn, you will bring your life story puzzle piece. You will highlight it by playing with its lines. To try it is to adopt it !
