Diameter : circonférence des gouttes: 1,11 cm

Description

Pair of earrings mainly in silver (swan hallmark) composed of two parts: - a "chip", fixed on the ear, equipped with a system in 750/°° yellow gold (18 KT, owl hallmark). These chips are made from elements from an old jewel, each decorated with an old-cut diamond. - from these chips are suspended two drops of beautiful volume, also in silver, entirely paved with grains of 8/8-cut diamonds in a slightly champagne color, more contemporary.... The two parts match perfectly and the champagne color of the diamonds is ideally in harmony with the deep color of the silver.... the particularly neat and refined setting work only gives to the wearer the brilliance of a thousand lights of the many diamonds which adorn these earrings..... brilliance accentuated by the mobility of the drops. The fixed "chip" parts
