Description

Junkerwerk (Carl Linder) company was founded in 1887 in the knife and blade city Solingen and was initially able to make its name as a manufacturer of knives and blades.

The 1911 Solingen directory mentions that the Carl Linder company had moved to Hauptstr. Nr. 45. In those days Carl Linder was one of the many manufacturers of pocket knives. His products even as early as 1911 were mainly hunting knives.

I guess that this knife dates between 1910 and the WW1
