140 EUR

Period : 19th century

Condition : Très bon état

Material : Nacre

Width : 10 cm

Depth : 6 cm fermé

Description

From the turn of the century, here is a pair of theater binoculars, then essential to see and be seen. This pair offers a decoration of mother-of-pearl slats called "black", this because of its dark and anthracite appearance playing with shades of pink, it is a much less common and magnificent mother-of-pearl. It has a padded case in black fabric, but I do not think it is the original case.
