

Art Nouveau Frame In Repoussé Brass With An Ogive Shape

120 EUR

Period : 20th century

Condition : Très bon état

Material : Brass

Width : 22 cm

Height : 25 cm

Description

Like a church stained glass window, it is very likely that this Art Nouveau frame is the work of a good sister or brother of some convent or monastery and sold with religious imagery. In embossed brass with a plant decoration that surrounds the opening for the photo (8 × 13), the back foot is made in a somewhat rudimentary way but works very well however.
