

Sidewalk Edges - 17th, 18th Century

130 EUR

Period : 17th century

Condition : Parfait état

Material : Stone

Length : 50 à 120 cm

Height : vu : hauteur de 20 cm

Depth : 30 à 35 cm

Description

How to outline your garden paths?

How to stop your paving surfaces?

How to align a lawned perspective?

Quite simply by re-implanting our traditional sidewalk borders.

Not the skinny ones in tasteless concrete that today surround all of our streets and the horrible, highly polluting bitumen surfaces!

But those in good, big limestone that our old road workers cut by hand 2 and 3 centuries ago...

Pieces of 50 to 120 cm, with a regular height of 25 cm,

Rather than on concrete, these pieces of stone are anchored on a solid and durable base stone.

To finish the whole thing, why not position, from length to length, wheel chases or bollards that

will break up the alignments of long lengths of
sometimes monotonous sidewalk borders...

Not having an infinite stock! In order to
constitute long lengths, we advise you to collect
all the lots that we can present for sale.
Very quickly, you will meet your needs.

We sell these pieces - generally from the 17th and
18th centuries - EUR130 per linear meter.

Ask us about the status of our stocks.

** Our usual carrier will be happy to estimate
your delivery if you give us your postal code.
