Description

This delightful sculpted biscuit group, entitled *Winged Angels*, is inspired by the delicate and graceful creations of Jean-Baptiste Pigalle, a renowned 18th-century sculptor. The work depicts two cherubs in a tender and playful scene, capturing a timeless innocence. The careful details of the faces and bodies, as well as the subtle treatment of folds and textures, testify to the virtuosity of the artist or workshop that created this piece. The delicately gilded wings add a touch of sparkle to the composition, contrasting elegantly with the matte whiteness of the biscuit. The base, decorated with symbolic elements, harmoniously completes the ensemble. Ideal for a collection dedicated to classical art or to bring a poetic and refined note to any interior.
