nerves, edges painted in red. Antoine Baumé is a French pharmacist and chemist (1728-1804). In the 1795 edition of his *Elements of Theoretical and Practical Pharmacy*, he attempted to demonstrate that water was not composed of hydrogen and oxygen by refuting the experiments of Lavoisier and Laplace. He contributed several articles on chemistry with Philippe Macquer to the publication of an encyclopedic dictionary: *Dictionnaire portable des arts et métiers*, a work prefaced by Pierre Joseph Macquer, Philippe's brother.
