

Ethnic Necklace In Amber And Metal

850 EUR

Signature : A définir

Period : 19th century

Condition : Très bon état

Material : Other

Length : 80

Diameter : 3,5x3

Description

Exceptional ethnic necklace composed of amber and white metal balls of great artisanal quality. And of great visual beauty! Weaving of colored fabric at the start of the necklace followed by balls of different calibers, very original! In very good condition (one ball a little gnawed) probably work of nomads? Imposing by its length and the diameter of the balls. 80 cm in length by 3.5 cm in diameter for amber and 3 cm for white metal (maybe silver? Not tested). Origin to be defined. Very beautiful and rare jewel!
