Description

Bombardiere - Old cast iron cannon

This type of weapon, impractical in a military context, was often used for festive purposes.
A cannon shot was fired to mark an event (inauguration, wedding, party, etc.).
It bears writing that is difficult to read and certainly indicates the location of a city and we can guess a date 1857 which must indicate the year the object was cast.

Height: 16cm
Width: 11cm
