Description

Superb sculpture in deer horn representing a couple making love, very fine, detailed and explicit work. These small objects were carved by sailors during their long sea voyages, when you know the hardness of these horns, you can only appreciate the quality of the result, also note the work in the drapes. Beautiful glossy patina, a little yellowed in places, 1st half of the last century or end of the 19th century. Good condition, height 18 cm and 21.5 with its small base (re-socled). A beautiful object of curiosity.
