BOUVIER, active mid-19th century. This large dimension is encountered here for the first time in almost 50 years... This object was used by shepherds and field workers, day laborers, etc. There were several sizes, the number of which varies according to the production centers, from 4 to 6. The shapes of these dinner carriers are variable, they are truncated in Burgundy, pomiform in Ile-de-France, flared in Anjou, etc.; the attachments of the handles, depending on the region, represent cherubs' heads, rosettes, fleurons, human masks, etc. Among the BOUVIER in CLAMECY, we note small variations in the number of curls in the hair of the cherubs' heads.
