Period : 20th century

Condition : Bon état

Material : Wrought iron

| Description |
|-------------|
|-------------|

Large trephine or trephine for neurosurgery with crank and handle. The instrument is signed "Gasselin Paris" and it measures 37cm in length. The handle, a rather unusual design and used to reinforce the support and the force of the surgery, fixed opposite the crank turns and is rotatable. It cannot not be used. Gasselin manufacturer of surgical and veterinary surgery instruments. The size of the instrument suggests surgical use on livestock or large ruminants. Despite a few punctures, good condition and perfectly working.
