Description

Ring from the 40s-50s in 750 thousandths gold (18K). It is decorated in its center in claw setting with a large round blue topaz of a very pretty color. Set back from the stone, a decorative piped motif with triple branches joins the ring to create a "flower" effect. This charming original ring is in good condition. Note: a trace of old sizing on the bottom of the ring which respected the hallmarks. PB: 4.20g TDD: 52
