

## Molars Incisors

145 EUR

Period : 19th century

Condition : Bon état

Material : Solid wood

### Description

Pun in the title... I meant that there are miniature molars, premolars, incisors and canines Monoxyles. This teaching material was probably intended for small dentistry students in a small faculty, in the country of small men no doubt....Imagine that the largest measures 25 millimeters on its base. The bases are sculpted in the mass.... Rare set of ten elements. Probably late 19th century or early 20th century
