Description

This painting, a refined example of early 18th-century miniature on copper, depicts a young girl with a delicate expression and aristocratic features. Her face is framed by a soft hairstyle and enhanced by refined details, such as dangling pearl earrings and a pearl necklace elegantly encircling her neck. The golden dress, richly decorated, further accentuates the grace of the figure. The piece is enclosed in a splendid Emilian frame, also from the early 18th century, characterized by baroque volutes gilded and lacquered in black, with finely carved acanthus leaf motifs, adding an aura of preciousness and harmony to the whole."
