Description

Beautiful crystal vase cut with diamond points, finely chiseled gilded bronze mount on the base and neck. Production of the Creusot factory, Charles X Restoration period, early 19th century around 1820. Taken over in 1804 by Jean-François Chagot, the Creusot crystal factory became a royal crystal factory again under the Restoration (Louis XVIII and Charles X). This period (1814-1830) was the most prosperous for Le Creusot. Its high-quality production earned it several gold medals at the Exhibitions of Industrial Products. The crystal factory produced many chandeliers, vases, lamps, clocks, as well as a multitude of small crystal objects such as bottles, carafes, goblets, glasses, egg cups, mustard pots or bowls. Large format, very decorative. Our vase is in perfect condition. No
