Description

Yvon Taillandier (1926-2018) "the world is automobile"

Oil on canvas 46 x 55 cm

Yvon Taillandier is one of the precursors of free figuration and art brut, painter, sculptor and writer. Yvon Taillandier's painting is figurative, constantly narrative and creates an imaginary world with its characters, its events. Inventor of "Taillandierland", the painter describes this invented world with its inhabitants, its universe. Mixing image and language, the painter claims a literary painting. Man is often coupled with machines that extend him. These curious characters have a certain timelessness.
