Pugliese Levi played a leading role in the flourishing school of Piedmontese landscape painting of the late nineteenth century. Having abandoned his scientific studies to dedicate himself to his passion for painting, he was a pupil of Enrico Gamba at the Albertina Academy. Interpreter of a refined and refined landscape, as well as the contemporaries of his land, he proves

capable of looking at the great international artists
while also welcoming impressionist suggestions.
This landscape is part of the artist's typical
production
