50s Display Cabinet (renovated)

520 EUR

Period : 20th century

Condition : Restauré par notre atelier

Material : Solid wood

Description

Large wooden display cabinet (oak and plywood) from the 1950s, which has until now been used in a medical practice. The original varnish being in excellent condition (apart from a few visible scratches on the right side) and of a beautiful color, it has simply been revived and protected with linseed oil then polished. The interior has been repainted in the color Ammonite by Farrow & Ball, a slightly grayed white. The display cabinet has 4 shelves in total (only 3 appear in the photos), all varnished in the same shade as the display cabinet. It opens and closes easily thanks to its magnetic door and its pretty original metal handle. This Fauvette is of wonderful craftsmanship and solid, it will accompany you for many years and will bring a nice vintage touch to your interior. Rare, to adopt quickly!
