Description

Gemini wardrobe - secretary in wood and ceramic by Boleslaw Danikowski, 60s design by Guillerme and Chambron (the famous trio of ceramic artists and designers from Lille for Votre Maison editions, from 1953 to 1979) Simple and original lines for the time, especially of high quality, the wardrobe is composed of an oak structure (the favorite material of the 2 northerners) a large double door part divided into 5 large storage spaces, on the one hand. On the other hand, it has an integrated secretary (Height of the work surface to the ground 78cm) held by 2 leather straps. Also 3 drawers below the secretary (H15cm / 52cm / 37cm) and a niche on the upper level ... Does anyone lack organization??
