Description

Sarcophagus Fragment - 18th century or earlier

This bas-relief carved fragment appears to be from a work inspired by ancient sarcophagi. It depicts a partially preserved male figure holding a cornucopia, a motif commonly associated with prosperity and the afterlife in Roman funerary iconography. The object has a patina of use.

It is mounted on the back with an antique hook, probably from the 19th century.

Height: 29 cm

Width: 16 cm
