Description

Fireplace panel. Metal. 19th century.

Fireplace panel decorated with a symmetrical composition in slight relief composed of a central sculptural motif from which smoke escapes, surrounded on the sides by bands and topped with a fleuron. This decoration recalls certain neoclassical works, but also presents neo-medieval touches (beasts at the top) and influences that can be linked to the baroque (movement of the line that frames the central motif, etc.). -

Dimensions: 66x2.5x91 cm
