Description

A large ovoid cup...

In white enameled porcelain...

In two parts...

From the end of the 19th century...

No cracks or chips...

Just a few small manufacturing defects (small pinheads of dirt in the enamel)...

And cracks below the base, at the bolt level...

And a small gap between the two parts, it seems to lean...

All these little things do not interfere in any way...

This is why it is as precise as possible...!

A few reliefs in the paste...

It is simple but effective...

Weight ... 1 kilo 954 gr
