Description

North African ceramic Pierre de VERCLOS (1886 - 1950) - NABEUL, Tunisia Around 1930/1940 VERY LARGE CERAMIC JUG (37cm diameter and 26cm high !!!), using Folk Art shape and Tunisian ceramic art design but modernizing them on the same time Detached handle. Decorated with polychrome enamels of circles and flowers' garlands. Arabic signature under its foot/base, Very large model In 1920, Pierre de Verclos arrived in Nabeul and founded a ceramics workshop that was part of the tradition previously embodied by Chemla. Very quickly, his workshop ,called "La Fabrique", grew more and more. Hethen engaged the brothers Hassan and Hassin Abderrazak who had worked for the Tissier and Chemla factories. It was then that the golden age of artistic pottery in Nabeul began,
